ABOUT ME

Final-year AI & Data Science student with practical experience applying machine learning algorithms and data analysis techniques to real datasets through academic and personal projects. Comfortable working end-to-end – from data exploration and preprocessing to model building and evaluation. Passionate about using data-driven approaches to solve real-world problems, and seeking opportunities to apply these skills in a professional setting.

EDUCATION

APOLLO INSTITUTE OF ENGINEERING AND TECHNOLOGY

2023-2027

B.Tech in Artificial Intelligence & Data Science

CGPA – 7.87/10

SKILL

Programming

- Python
- CSS
- SQL

Libraries

- Pandas
- NumPy
- Streamlit
- Plotly
- Joblib
- CustomTkinter / Tkinter
- openpyxl
- Matplotlib
- Seaborn

AI/DATA

- EDA
- Feature Engineering
- Machine Learning
- Algorithms
- TF-IDF
- Power BI

PROJECTS

Email-intent-classifier

- Built a Python-based text classification system to automatically detect and categorize email intent, using TF-IDF vectorization and a Calibrated Linear SVM model for accurate predictions.
- Developed a desktop GUI (CustomTkinter/Tkinter) for easy interaction, with results exportable to Excel/JSON for record-keeping and analysis.
- Applied an end-to-end ML workflow – from data preprocessing (pandas) to model training, evaluation, and deployment (joblib) – achieving reliable intent classification on real email data.

CogniLedger_AI

- Developed an AI-powered financial dashboard using Streamlit, integrating fraud detection and revenue forecasting into a single interactive platform.
- Implemented Isolation Forest for anomaly/fraud detection and Linear Regression for financial forecasting, with results visualized through dynamic Plotly charts.
- Built an end-to-end pipeline – from data processing (Pandas/NumPy) to model training and deployment (Scikit-learn, Joblib) – with a custom-styled UI (CSS) for a polished user experience.

TalentIQ AI Recruitment Intelligence Dashboard

- Designed a multi-page Power BI dashboard to deliver AI-driven insights into recruitment metrics, helping streamline hiring decisions and talent analytics.
- Built interactive visualizations across pages covering key areas like candidate pipeline, sourcing effectiveness, hiring trends, and recruiter performance.
- Enabled data-driven decision-making for HR/recruitment teams through consolidated, easy-to-navigate dashboards with drill-down capabilities.
